# H5I\_TYPE\_EXISTS

Determines whether an identifier type is registered

## Procedure:

H5I\_TYPE\_EXISTS(*type*)

## Signature:

```
htri_t H5Itype_exists( H5I_type_t type )
```

## Parameters:

<i>H5I_type_t</i> <i>type</i>	IN: Identifier type
-------------------------------	---------------------

## Description:

H5I\_TYPE\_EXISTS determines whether the given identifier type, *type*, is registered with the library.

## Returns:

Returns a positive value if the type is registered.  
Returns 0 if the type is not registered.  
Returns a negative value when the function fails.

**Example:**

Coming Soon!

**History:**

Release	Change
1.8.0	Function introduced in this release.
