

HDF4

Welcome to the HDF4 Support Page!

Current Release: HDF 4.2.15

[Download](#)

HDF4 (also known as HDF) is a library and multi-object file format for storing and managing data between machines. There are two versions of HDF technologies that are completely different: HDF4 and HDF5. HDF4 is the first HDF format.

Although The HDF Group maintains HDF4 by fixing defects and porting it to new operating environments, there is no longer any new development occurring. HDF4 is considered deprecated and new products should be developed in [HDF5](#). See this [FAQ](#) for details.

Release Documentation

Note: Firefox may hang when attempting to download a PDF. To obtain the file right click on it and select "Save Link As" from the pop-up menu and then download the file.

User's Guide	Reference Manual	Specification Developer's
 HDF4_UG.pdf <p>Right-click and select Save Link As to download</p>	 HDF4_RM.pdf <p>Right-click and select Save Link As to download</p>	 HDF4_DC <p>Right-click and select Save L</p>
